

Blend Battleship

Game Instructions

1. You will need two boards, one for your student and one for yourself. Also you will need markers and cover sheets.
2. You and your student should start by marking your ships in the My Ships area of the game board. Make sure that you cannot see each other's game boards. You should mark out a four space ship, a three space ship, and a two space ship. Once you and your student have marked your ships, cover up the My Ships area of the game board.
3. Play proceeds by going back and forth and guessing one space at a time to see if you can locate your opponent's ships.
4. When you guess a space, you give the coordinates and the word within the coordinates. For example, bl, one, black. The other player then responds with a hit, if the coordinate is where their ship is, or miss, if the space is not one of their ships.
5. Play proceeds until someone has sunk all of their opponent's ships.
