

Suffix Hopscotch Game Instructions

Game Instructions:

(One Player)

1. Take the hopscotch boards and line them up in a single column to make one long hopscotch board.
2. Have your student roll the die.
3. The number he/she rolls is the number of spaces he/she moves up the board. Have your student use his/her fingers on either hand to move up the board. (Index finger for single blocks/ Both index and middle finger for double blocks/ Three fingers for triple blocks.)
4. As your student moves up the board, have him/her read the sound on the single blocks and the combined word on the double and triple blocks.
5. If your student reads the sound or word wrong, review the correct answer and have him/her move back two spaces. (Note: The double/triple blocks count as one space, since they combine to form one word)
6. The goal is to reach the top of the board with the fewest mistakes.
